

2025 Stahlman Beekeeping E-mail Notes Issue #10a

Spring always is a busy period, and essential tasks must be done. This is build-up time for honeybees. This article is short but part of the work that beekeepers do is work with the natural instinct of honeybees to build bee populations. Many new beekeepers are just getting started. It is time to take advantage of the natural nature of honeybees to reproduce.

I have heard the saying "It's like drinking from a fire hose!" It is comfortable period of the year to work outside, and it is time to get off the couch and get going.
