

2025 Stahlman Beekeeping E-mail Notes Issue #27a

Inspections are important in these hot humid summer days. Treating for mites is important but as far as I am concerned, if a colony does not have a queen during this time period, valuable time will be lost trying to save the colony. This issue addresses this problem.

Issue #28 will be published on July 19th. No issue next week. I have been invited to help in a beekeeping fund raising event in Ohio. This event will take up a bit of time and give me a chance to meet up with old friends.

Dana

The poster features a portrait of Dana Stahlman on the left. The background is dark teal with a honeycomb pattern in the top right and bottom right corners. The Sandusky River Valley Beekeepers Association logo is in the top right, featuring a yellow honeycomb and a bee. The text is centered and right-aligned.
